Description

Round 1: 'Plotting the box'

In this round, everyone will be divided into a team of two. One member to stand in the box and the other to roll the dice the questions for the teams will be disclosed in a UNO card . After every successful answer the team gets forward to the next box and they will be handed a circuit diagram which they have to acquire the parts by getting right answers and moving forward.

The team with the highest number of components at the end reaches the next round.

Round 2

The 2nd round will be played with same set of rules and protocols with the winners of the first round.
